Efficient

Eliminate the need for local software and directory management with our cloud-based processing platform, freeing up resources for other high value work

lortondata

A better solution. A better partner!

Secure. Available. Confidential.
The security of your data is paramount.

Lorton Data has a long history of establishing and refining its controls to secure client data in an ever changing and increasingly connected world

Lorton Data is audited by an independent external organization under the requirements of the American Institute of Certified Public Accounts, and receives a SOC 2 Type 2 report for security, availability, confidentiality, and privacy of our data center and data processing

Lorton Data provides, manages, and analyzes data to enhance our customers' connections through multichannel marketing efforts.

Since the beginning, Lorton Data has focused on innovation, customer success through collaboration, and employee development to create a world class organization.

Lorton Data is a privately owned company, founded in 1989.
